

Industrial Hygiene

Introduction

LEHDER specializes in workplace health hazard assessments that provide our clients with the ability to protect the health and safety of workers.

What is Industrial Hygiene?

Industrial Hygiene is the science devoted to the management of those factors arising in or from the workplace that may cause sickness, impaired health or illness among workers.

Goals of Industrial Hygiene

The goals of Industrial Hygiene are:

- To protect the health and well-being of the worker
 - To minimize workplace health risks
 - To prevent occupational injury and illness
 - To manage future health risks
-

When and Where is Industrial Hygiene used?

Industrial Hygiene is a proactive program used from the shop floor to the manager's office. Industrial Hygiene is used when:

- Health hazard issues arise
 - Regulatory changes are proclaimed
 - New projects and processes are being engineered
 - Risk assessments are performed
 - New materials and equipment are introduced to the workplace
-

LEHDER Capabilities

LEHDER capabilities in Industrial Hygiene include:

- Health hazard assessments of new and existing processes and products
 - Exposure assessment and monitoring through a combination of qualitative and quantitative methods
 - Health regulatory compliance appraisals and legal liabilities
 - Hazard control programs
 - Program development and implementation
 - Specific health and safety training to workers about risks and control measures
 - Audit Industrial Hygiene programs
 - Shutdown and Turnaround IH support services
-
