

LEHDER

Excellence in Industrial Air Quality Services ®

LEHDER Environmental Services Celebrating 15 Years!

Formed in 1995, LEHDER Environmental Services is now one of the largest Air Quality Management companies in Canada. At LEHDER we recognize our clients need to make decisions that provide for operational flexibility while meeting regulatory, economic and social requirements.

All Air Quality aspects - source testing, emission inventories, air dispersion modelling, data interpretation and approval applications - are managed internally without outsourcing and partnering.

The LEHDER name is pronounced "leader", and comes from the surnames of the original founding partners of the company; Sid Lethbridge, Des Hayles, Mike Denomme and Mark Roehler.

Contact LEHDER now to discover how we can meet the needs of your industry.

LEHDER

Excellence in Industrial Air Quality Services ®

Air Quality Services

LEHDER Environmental Services Limited is one of the largest Air Quality Management consulting companies in Canada. Our core strength in Air Quality is demonstrated in the LEHDER Environmental Information Management Services (LEIMS) which integrates source and emission inventories, air dispersion modeling and NPRI reporting. At LEHDER, we recognize our client's need to make decisions that provide for operational flexibility while meeting regulatory requirements, economic goals and social responsibilities.

Emission Testing

LEHDER's Emissions Testing Team is one of the largest and most experienced in Canada and is recognized by Canadian and US regulatory agencies. Although geared to provide high grade industrial emission testing services for compliance purposes, many projects conducted by LEHDER are related to the development of process-specific pollutant emission factors for various inventories and approval applications. These large projects often involve simultaneous testing and the deployment of multiple field crews. Three of the LEHDER Principals are field leaders and source testing project managers.

EH&S Services

LEHDER's Environmental, Health and Safety expertise helps clients stay on top of potential compliance concerns. Services include occupational hygiene, hazardous materials training and management systems (TDG, IATA, Waste, WHMIS), environmental compliance audits and MSDS authoring and management services. LEHDER is ready to assist with upcoming changes to WHMIS and MSDSs as a result of the implementation of the GHS: Globally Harmonized System of Classification and Labelling of Chemicals.

Regulatory Training

On-site regulatory training programs can be customized and delivered to meet a client's regulatory needs in environmental, transportation, workplace, health and safety. LEHDER offers regularly scheduled environmental, health and safety courses at our facilities located in Point Edward, Ontario and Edmonton, Alberta. Train the Trainer programs available for most courses.

Market Sectors

LEHDER provides services to companies in the petroleum and petrochemical sectors, steel industry, glass manufacturing, mining and smelting industries, automotive and associated suppliers, hospitals and health care facilities, government agencies, organic and inorganic chemical manufacturers, food processors, marine transport, pharmaceutical manufacturers and the pulp and paper industry.
